Mountain Papuans

Historical and Comparative Perspectives

An important contribution to the Melanesian literature, *Mountain Papuans* examines three societies—the Daribi, Foi, and Etoro—of the southern New Guinea Fringe Highlands. Challenging the assumption that high-density, high-intensity Central Highlands societies represent the most complex examples of social evolution in interior New Guinea, *Mountain Papuans* argues that the low-density, low-intensity southern Fringe Highlands societies can be considered equally evolved and specialized.

"These are fine papers, stimulating and provocative..."—*American Anthropologist*

ANTHROPOLOGY FOR TOMORROW:

CREATING PRACTITIONER-ORIENTED APPLIED ANTHROPOLOGY PROGRAMS

—Robert T. Trotter II, editor

Anthropology Practice is one of the hottest growth areas in anthropology today, and *Anthropology for Tomorrow* provides a model for developing practitioner-oriented applied anthropology programs.

This book, edited by Robert T. Trotter II, contains contributions from 15 authors who represent some of the most successful practitioners and some of the strongest academic leaders in the field of applied anthropology. It covers its subject thoroughly, from an exploration of program philosophies, through program development, to practical suggestions for creating and maintaining successfully tested innovations in training applied anthropologists.

The book provides models for applied programs at both the graduate and undergraduate levels, and discusses the essential core curriculum issues. It has several chapters that focus on the planning necessary for solid program development, and that point out the pitfalls to be avoided—from internal politics to departmental relationships university-wide. Other chapters illustrate successful applied program structures, relate university-industry linkages, and suggest ways to build solid ethics education into the program. It concludes with a provocative projection for the future of applied anthropology.

Anthropology for Tomorrow should prove useful for everyone interested in applied anthropology programs, from the development of a single applied course, to the creation of a well-articulated practitioner-oriented program involving an entire departmental faculty.

ANNOUNCING THE SPINDLER SERIES CASE STUDY PRICE REDUCTION!

For years many of you have used Holt, Rinehart and Winton's Case Studies in Cultural Anthropology in your introductory and intermediate anthropology classes. Recently you've been concerned about the rising prices of the series, making it difficult for you to assign these case studies as often as you would like.

As of February 1, 1989, we're reducing the prices of every case study by 40%—that means your students will not pay more than \$8.00 for any case study you assign!

We're reducing our prices to serve you better so that you can give your students the variety of case studies they need at a price they can afford.
