MEDICAL ANTHROPOLOGY† Cross-Cultural Studies in Health and Illness

Editor in Chief: Lawrence S. Greene,
Department of Anthropology, University of
Massachusetts, Boston

Medical Anthropology publishes papers that explore the relationships among health, disease, illness, treatment and human social life. Emphasis is placed on the cross-cultural similarities and differences in the way people cope with health problems. The journal welcomes papers based on empirical research as well as those which deal with significant methodological and/or theoretical issues. Papers are published from all areas of medical anthropology as it is broadly defined. The primary goal of the journal is to bring to our readership papers which have a strong bio-cultural focus and which deal with important issues encompassing all aspects of the discipline.

What next for Amazonia?

Anatomy of the Amazon Gold Rush

By David Cleary

In 1979, the biggest gold rush of this century began in the Brazilian Amazon and has continued unabated ever since. This landmark volume takes the first broad and balanced anthropological look at the gold rush to explain its history, the social organization of the gold camps, the politics and economics of gold in Brazil, and the implications of the gold rush for Amazonia and its people.

To Square with Genesis Causal Statements and Shamanic Ideas in Wayāpi

By Alan Tormaid Campbell

The Wayāpi Indians of Brazil's Amazonian rainforest, thought to be extinct until their "discovery" in 1973, are threatened now by the overwhelming forces of an expanding frontier. *To Square with Genesis* presents an unusual, iconoclastic ethnography of these beleaguered people and a strong appeal for less distant, more humanistic anthropological writing.

Cultural Anthropology, Fourth Edition

by *Serena Nanda*

John Jay College of Criminal Justice—CUNY

"Her work might be taken as a model by other authors in the field... Bravo!" praises one reviewer. Over three editions, Nanda's skillful presentation of anthropology's basic principles, theories, methods, and data has led students to question their own ethnocentric biases—and make "sense" of the behavior and culture of others. *New chapters on "Human Adaption and Culture" and "Nonkin-Based Forms of Association", plus seven new ethnographies.*

Culture and Conduct: An Excursion in Anthropology, Second Edition

by *Richard A. Barrett*

University of New Mexico

What is it that working anthropologists actually do? What issues and ideas interest them? Barrett tackles some of the questions that survey texts leave unanswered—giving students a vivid overview of the fieldwork experience. *Updated chapter on fieldwork, and a revised chapter on culture.*
