FORMAL METHODS IN ECONOMIC ANTHROPOLOGY

edited by Stuart Plattner

This volume grew out of a conference held at the University of Missouri-St. Louis in October 1972. The contributors to it represent a younger generation of scholars who are attempting to break new ground in economic anthropology by refining some of the classical methodologies and developing new formal strategies for analyzing data. It is significant that all of them have done fieldwork. An important aspect of this book is that they discuss various formal techniques while paying especial attention to their applications to their own field material. In publishing this volume the American Anthropological Association hopes to enable methodologists to address the anthropological profession at large and, at the same time, to provide materials for a well-informed debate concerning the use of formal methods in the analysis of sociocultural situations.

Selected Papers from the American Anthropologist

These three volumes, published in commemoration of the 75th anniversary of the American Anthropological Association and in recognition of its major role as the publisher of the nation's oldest and most illustrious anthropological journal, comprehensively represent the trends and interests within anthropology through the various phases of its history, reflecting the highest qualitative standards of the *American Anthropologist* and the discipline it serves.

1888-1920

edited by **Frederica de Laguna**

Selections in this volume represent the interests and accomplishments in American anthropology from the establishment of the *American Anthropologist* through World War I, chosen to exhibit the theoretical, methodological and factual contributions in as many aspects of anthropology as possible, and by as many authors. To illustrate the growth of the discipline, some contemporary surveys and historical summaries, as well as significant book reviews and obituaries, are also included. An introductory essay by A. Irving Hallowell, as well as the editor's Selected Bibliography on the History of Anthropology and introductory notes to the reprinted articles, provide a valuable historical perspective. (This is a reissue of the 1960 edition published by Row, Peterson and Company for the AAA.)

1921-1945

edited by **George W. Stocking, Jr.**

The interwar period was one of intellectual and institutional diversification in American anthropology, as the students of Franz Boas followed out the diverging leads implicit in their mentor's ambiguous orientation between science and history. Responding to new intellectual influences mediated by departmental affiliations with sociology and the interdisciplinary movement in the social sciences, as well as by fieldwork situations quite different from those of the American Indian reservation, anthropology in the United States turned from historical reconstruction toward synchronic study. Simultaneously, the traditional unity of the field was threatened by "centrifugal forces of specialization" reflected in the creation of new professional organizations in each subdiscipline. In the context of possibilities for government support opened up by the discipline's participation in the war effort, however, the organizational unit of a general science of man was preserved in the restructuring of the AAA after World War II. The editor's introductory essay provides an in-depth historical analysis of the period.

ix + 485 pp. \$10 cloth / \$6 paper

1946-1970

edited by **Robert F. Murphy**

This volume represents a cross-section of anthropological thought during the past quarter century, providing a sampling from the subfields of anthropology and from its various theoretical and topical directions, and at the same time presenting those essays of greatest merit and influence. The selections, together with the editor's summary history of the discipline during the period, yield a volume that encapsulates the recent history of anthropology, both in the United States and abroad.

vi + 424 pp. \$9 cloth / \$5 paper

As a special offering, prepaid orders received by December 1, 1976, will carry a special price for the entire set of three volumes: \$25 cloth / \$15 paper.

THE STUDY OF CULTURAL ANTHROPOLOGY

DAVID E. HUNTER and PHILLIP WHITTEN

This text goes beyond the basic facts of cultural anthropology to teach students how anthropologists think and work. It is the only cultural anthropology text that is specifically structured to reflect the comparative and holistic themes, the systems and processes, the folk and analytical perspectives, and the case-study emphasis that underlie the theory and practice of anthropology.

Theory and issues are presented in twelve chapters, each of which is organized into four parts: the world context, theory, analysis, and conclusions. Four chapter-length case studies conclude the text. This carefully and consistently structured presentation helps students practice anthropological thinking, chapter after chapter. Tentative: 512 pages; \$9.95. January 1977. ISBN 0-06-043014-1. *Study Guide*: \$4.95 (tentative); ISBN 0-06-043012-5. *Instructor's Manual*.

DOING ANTHROPOLOGY

**A STUDENT-CENTERED APPROACH
TO CULTURAL ANTHROPOLOGY**

**DAVID E. HUNTER and MARYANN B. FOLEY
PHILLIP WHITTEN, General Editor**

This innovative text teaches students what it means—and how it feels—to think and work like an anthropologist. The book consists of a carefully graded sequence of twenty-seven exercises that build on students' *own* experiences.

Progressing from simple observations to intricate considerations of space use and semantic structures, the exercises encourage students to think in new ways, to enter into internal dialogues, and to observe events and patterns of events from an anthropological perspective.

The book may be used as a core text or to supplement THE STUDY OF CULTURAL ANTHROPOLOGY or any other introductory text. Tentative: 288 pages; \$5.95/paper. August 1976. ISBN 0-06-043011-7.
